Student Technology and Online Acceptable Use Guidelines

Technology and online resources provide valuable opportunities for research, curriculum support, and career development. Toward this end, the NPS provides a number of technology and online resources to students. With such great possibilities for education also comes the potential for abuse. Members of the Newton Public Schools community are responsible for appropriate use of technology and online resources. General school rules for behavior and communications apply.

The purpose of the Student Technology and Online Acceptable Use Policy and Guidelines is to ensure that students utilize access in a responsible manner consistent with the educational purpose of providing these resources. By accepting access to these resources, students are charged with the responsibility to use them appropriately.

NPS reserves the right to place reasonable limits on materials posted or accessed through its technology and online resources.

Through education, supervision and responsible use, the Newton Public Schools believe that the Internet can be used safely and effectively. In addition, the instructional technology and library teachers have developed a series of lessons to promote use of the Internet in safe and responsible ways at the elementary and middle school level. Even with these safeguards in place, however, there is no absolute guarantee that users might encounter objectionable material.
